

Creating your Ubuntu Learning Account

The first step is setting up your account so you can login to your course on the Ubuntu Learning Platform. This article will show you how.

When your account is registered on our platform, you will receive an email to complete the next steps. This includes choosing a password. Let's take a look at how you complete these steps.

1. You should receive an email to your inbox. Go ahead and click on the button **Confirm Email** to complete the steps.

Note: Make sure to check your Junk/Spam folder in case the email ends up here.

2. You will then be prompted to confirm your **Full Name** and then choose a password. Enter your password that you will use to access Ubuntu Learning and then again in the **Confirm Password** field. Once you are done click the **Finish** button to complete the steps.

Set a Password

In the future, you can use this account to access UbuntuLearning | Connect RP

Please update your password

Email Address

owen@

Full Name

Test Account

Password

Confirm Password

Finish

3. You will then get a confirmation that you are now setup. Click on the ***Go to Courses*** button to access your courses.

 **Thanks for confirming!**
